

Installation de la bibliothèque RoboBrowser

Installation pour Anaconda :

```
pip install robobrowser
```

```
# -*- coding: utf-8 -*-
"""
Éditeur de Spyder

Ceci est un script temporaire.
"""

from robobrowser import RoboBrowser

url = 'http://pronote.lyc-valadon.ac-limoges.fr/professeur.html'

browser = RoboBrowser(history=True)
browser.open(url)

# if you want to print the page...
# print (browser.parsed)

#get form
form = browser.get_form(id='commentform')

#fill out form
form['comment'].value = 'Very interesting article'
form['author'].value = "Ebbe Vang"
form['email'].value = "lort@lortemail.dk"

#submit form/page
browser.submit_form(form)

# print page
print(browser.parsed)
```
