Installation de la bibliothèque Scapy

Sous Windows

pip3 install scapy-python3

Debian

Il y a deux manières d'installer Scapoy :

- installation avec **pip**

```
root@debian:~# apt update && apt upgrade
root@debian:~# apt install python3 python3-pip
root@debian:~# pip3 install scapy-python3
root@debian:~# apt install tcpdump
```

- installation en clonant depuis github <code shell> root@debian:~# apt update && apt upgrade root@debian:~# apt install git root@debian:~#git clone https://github.com/phaethon/scapy root@debian:~# cd scapy root@debian:~# python3 setup.py install root@debian:~# apt install tcpdump </code>

Lancement de scapy

<code shell> root@debian:~# scapy INFO: Please, report issues to https://github.com/phaethon/scapy WARNING: IPython not available. Using standard Python shell instead. Welcome to Scapy (3.0.0)

<

/code>

Quitter Scapy

```
>>> quit()
root@debian:~#
```

Kamene le fork de scapy

Retour à Python : la bibliothèque Scapy ...

- Python : la bibliothèque Scapy pour manipuler les paquets réseau
